## Professional Summary

MCA graduate with hands-on experience in building scalable web applications using the Java/Spring Boot ecosystem. Proficient in developing responsive front-ends with HTML5, CSS3, and JavaScript, React and managing relational data with SQL. Strong foundation in Object-Oriented Programming (OOP), Data Structures S Algorithms (DSA), and RESTful API design. Committed to writing clean, maintainable code and contributing to agile development teams.

## Education

Master of Computer Applications (MCA) — NIST University, Berhampur (2023 – 2025)

CGPA: 8.15 / 10

Bachelor of Science in Physics — Berhampur University (2019 – 2023)

CGPA: 7.1 / 10

## Technical Skills

- Languages: Java (Core S Advanced), Python, JavaScript (ES6+)
- Backend Development: Spring Boot, Hibernate, RESTful APIs, Microservices
- Frontend Development: HTML5, CSS3, JavaScript, React.js, Bootstrap
- Databases: MySQL (Relational), MongoDB (NoSQL)
- Core Engineering: Object-Oriented Programming (OOP), Java Collections Framework, Data Structures S Algorithms (DSA)
- Tools S Version Control: Git, GitHub, VS Code, Postman, Maven

## Certification Course

**Java full stack developer – Kodnest, Bangalore, (Jul 2025 – Apr 2026)**

- Undergoing intensive technical training in the Java/J2EE ecosystem, focusing on building scalable enterprise applications.
- Actively developing full-stack projects using Spring Boot for microservices, RESTful APIs for data exchange, and React/JavaScript for dynamic front-ends.
- Gaining deep proficiency in Data Structures (DSA) and SQL database optimization to ensure high-performance software delivery.

## Projects

**TaskMate – Task Management App | React, JavaScript, HTML5/CSS3**

- Developed a full-stack task manager featuring CRUD operations and persistent state management.
- Optimized UI performance using React Hooks (useState, useEffect) and component-based architecture.
- Implemented dynamic filtering and real-time status tracking to improve user productivity.

**Weather Application | JavaScript (ES6+), REST API, CSS3**

- Engineered a responsive app integrating OpenWeatherMap API to fetch real-time meteorological data.
- Utilized Asynchronous JavaScript (Fetch/JSON) to dynamically update temperature and humidity metrics.
- Focused on clean UI design and efficient error handling for seamless data retrieval.
